Electrode Features

Glass body

The HI9810372 features a non-porous glass body that is easy to clean and disinfect.

Fast, stable readings

The open junction reference provides for a direct contact with the skin or scalp, ensuring a stable measurement.

The double junction design presents a silver-free electrolyte solution interacting with the sample, making the electrode less susceptible to clogging and guaranteeing a fast response and stable reading.

Built-in Temperature Sensor

Built-in temperature sensor at the tip of the pH electrode allows for rapid determination of the sample temperature and a high-accuracy temperature reading.

* Available with Hanna Lab App
Note: The tester can display measurements from -2.00 to 16.00 pH. Measurements outside of the pH range will flash.
